

# Weekly COVID-19 Surveillance Report in Leicestershire

Cumulative data from 05/02/2020 - 04/07/2020

This report summarises the information from the surveillance system which is used to monitor the cases of the Coronavirus Disease 2019 (COVID-19) pandemic in Leicestershire. The report is based on daily data up to 4 July 2020.

The maps presented in the report examine counts and rates of COVID-19 at Middle Super Output Area. Middle Layer Super Output Areas are a census based geography used in the reporting of small area statistics in England and Wales. The minimum population is 5,000 and the average is 7,200.

Disclosure control rules have been applied to all figures not currently in the public domain. All counts have been rounded to the nearest 5 and those between 1 to 7 have been suppressed.

Data has been sourced from Public Health England. The report has been compiled by Strategic Business Intelligence in Leicestershire County Council.

# Weekly COVID-19 Surveillance Report in Leicestershire

Cumulative data from 05/02/2020 - 04/07/2020

Breakdown of testing by Pillars of the UK Government's COVID-19 testing programme:
